Summary

Detail-oriented AI Data Operations Specialist & Chemical Engineer with hands-on expertise in computer vision annotation, dataset quality assurance (QA), and data-driven process optimization. Proven track record in high-throughput computer vision labeling (350+ complex assets/day), 2D/3D spatial modeling, and frame-by-frame video tracking across CVAT, V7 Darwin, and SuperbAI. AWS Certified Cloud Practitioner with a strong foundation in data modeling, statistical analysis, and customer operations. Adept at turning complex unstructured data into high-precision, production-ready training datasets for enterprise AI models.

Education

Kwame Nkrumah University of Science and Technology (KNUST)

Bachelor of Science in Chemical Engineering

Sept 2019 - Nov 2023

Skills

Data Analysis & Technical Tools: Python, MATLAB, Advanced MS Excel (Pivot Tables, Data Validation, Statistical Dashboards), MS Word
AI Data Annotation & Computer Vision: Polygon Annotation, Bounding Boxes, 3D Cuboid/Point Cloud, Semantic Segmentation, Keypoint Tracking, Frame-by-Frame Video Tracking, Thermal/IR Image Labeling, Data Quality Control (QC)
Annotation & ML Tooling: CVAT, V7 Darwin, SuperbAI, Labellmg
Cloud & Infrastructure: AWS Cloud Practitioner (AWS CAF, AWS Well-Architected Framework, S3, IAM, EC2 basics)
Engineering & Process Optimization: Root Cause Analysis, Overall Equipment Effectiveness (OEE), Hazard Analysis, Quality Assurance

Certifications

AWS Certified Cloud Practitioner

Amalitech

June 2025

- Cloud Architecture, AWS CAF, Well-Architected Framework, Security & Compliance.

Work Experience

Data Annotator & Computer Vision Specialist

AYA DATA

Oct 2024 - Present

- Annotated high-resolution Infrared (IR) and thermal imaging data from marine security vessels using V7 Darwin, consistently generating 350+ tightly-fitted polygon assets daily.
- Performed 2D bounding box, polygon, and multi-object tracking on high-fps video sequences using CVAT, maintaining spatial precision for object detection models.
- Executed 3D bounding box spatial annotations on LiDAR/depth-sensor datasets to support 3D perception models in complex environments.
- Achieved a consistently high throughput while maintaining an internal precision benchmark exceeding 98.5%, directly accelerating client model training cycles.

AI Data Specialist

RWS Group

Nov 2024 - Jan 2025

- Conducted end-to-end Quality Assurance (QA) and data auditing for large-scale Computer Vision (CV) and Natural Language/AI datasets, achieving a 99.2% accuracy rating.
- Audited, corrected, and validated complex multi-modal annotations across thousands of data points to ensure compliance with strict project taxonomy and labeling guidelines.
- Identified annotation edge cases and collaborate with global AI project leads to refine labeling guidelines, reducing overall dataset error rates by 20%.

Process Engineer / Process Technician

Gallina Blanca (GB) Foods

Nov 2023 - Oct 2024

- Monitored and logged real-time operational data for enterprise food manufacturing production lines producing 100,000+ units daily.
- Built and maintained MS Excel tracking models to capture machine downtime, laminate packaging wastage, and shift outputs, improving Overall Equipment Effectiveness (OEE) reporting accuracy by 30%.
- Analyzed waste metrics across 4 production departments, identifying root causes of laminate loss and contributing to a 12% reduction.
- Presented weekly yield and downtime reports to senior management, supporting data-backed operational adjustments.

Volunteering

Academic Mentor

Department of Chemical Engineering

Oct 2022 - Oct 2023

- Mentored 5 juniors in academic coursework, including chemical process calculations and plant design, improving student performance.
